

## **“Pink House” Miami Shores**

Built in 1976 by architects Laurinda Spear and husband Bernardo Fort- Brescia, The Pink House is a symbol of modern design in Miami. Constructed of concrete, stucco and glass, the tall narrow house is painted in five different hues of pink, reflective of the tropical climate of Southern Florida.

The home was designed to maximize the bay front views, breezes and sunlight, while blurring the lines between the indoors and outdoors with pools, patio and tall windows. The Pink House is a marvel that embodies Miami’s rich architectural heritage.

The Pink House is an architectural medley of form, light and scale that compliments its natural environment. Geometrically constructed with concrete, stucco and glass brick, the house is built one story above ground on the edge of Biscayne Bay.

The four and a half foot wide main corridor is reminiscent of a ship’s walkway which also blurs the boundaries between indoor and outdoor spaces. The swimming pool takes on this indoor/outdoor theme built on the second floor this cascading pool invites a swim on a hot day.

Locations Extrordinaire invite you to partake on exclusive access to this architectural marvel. The Pink House is ideal for hosting events with up to 75 guests dining outdoors Bayside with stunning views of Miami Beach.
